

Full prescribing information:

1. INDICATIONS AND USAGE

ALPHAGAN® (brimonidine tartrate ophthalmic solution) 0.15% is an alpha-adrenergic receptor agonist indicated for the treatment of elevated intraocular pressure (IOP) in patients with open-angle glaucoma or ocular hypertension.

2. DOSAGE AND ADMINISTRATION

This product is contraindicated in patients with an allergy to ALPHAGAN® or any of its inactive ingredients.

3. CONTRAINDICATIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

4. PRECAUTIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

5. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

6. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

7. USE IN SPECIFIC POPULATIONS

8. PREGNANCY

9. NURSING MOTHERS

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

10. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

11. DESCRIPTION

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

12. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

13. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

14. HOW SUPPLIED/STORAGE AND HANDLING

15. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

16. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

17. CONTRAINDICATIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

18. PREGNANCY

ALPHAGAN® may cause dependence, tachycardia, hypotension, and bradycardia, and other cardiovascular effects.

19. NURSING MOTHERS

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

20. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

21. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

22. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

23. HOW SUPPLIED/STORAGE AND HANDLING

ALPHAGAN® is supplied in a sterile solution for eye drops.

24. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

25. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

26. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

27. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

28. HOW SUPPLIED/STORAGE AND HANDLING

ALPHAGAN® is supplied in a sterile solution for eye drops.

29. CONTRAINDICATIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

30. PREGNANCY

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

31. NURSING MOTHERS

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

32. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

33. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

34. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

35. HOW SUPPLIED/STORAGE AND HANDLING

ALPHAGAN® is supplied in a sterile solution for eye drops.

36. CONTRAINDICATIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

37. PREGNANCY

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

38. NURSING MOTHERS

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

39. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

40. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

41. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

42. HOW SUPPLIED/STORAGE AND HANDLING

ALPHAGAN® is supplied in a sterile solution for eye drops.

43. CONTRAINDICATIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

44. PREGNANCY

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

45. NURSING MOTHERS

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

46. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

47. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

48. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

49. HOW SUPPLIED/STORAGE AND HANDLING

ALPHAGAN® is supplied in a sterile solution for eye drops.

50. CONTRAINDICATIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

51. PREGNANCY

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

52. NURSING MOTHERS

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

53. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

54. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.

55. PATIENT COUNSELING INFORMATION

Inform patients that ALPHAGAN® may cause some or all of the following:

- Eye irritation
- Blurred vision
- Conjunctival hyperemia
- Other ocular findings

56. HOW SUPPLIED/STORAGE AND HANDLING

ALPHAGAN® is supplied in a sterile solution for eye drops.

57. CONTRAINDICATIONS

ALPHAGAN® is contraindicated in patients with an allergy to brimonidine tartrate or any of its inactive ingredients.

58. PREGNANCY

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

59. NURSING MOTHERS

ALPHAGAN® may cause some or all of the following:

- Dependence
- Tachycardia
- Hypotension
- Bradycardia
- Hypertension
- Other cardiovascular effects

60. ADVERSE REACTIONS

The most common adverse reactions (occurring in 1% or more) are eye irritation, dryness, blurred vision, conjunctival hyperemia, and ocular hyperemia.

61. CLINICAL PHARMACOLOGY

ALPHAGAN® is a beta-blocker that is used to lower eye pressure.
